Discovered Part in 1999

thence & perhaps 17 affluents
By 300 it had prepared for contents
as a kind of entrance

C 700

The sample device of the stirrup probably invented in China in the 4th century, was introduced into western Europe (c 700) and at once gave rise to the supremacy of the mounted knights in warfare & hence in society.

By giving him a firm foothold the stirrup enabled a horseman

to fight as a gallop without
restraint. He could wield his
~~sword~~ sword without fear of being
unseated.

The 8th century Frankish Cavalry
was a far superior force to a Persian
and Byzantine cavalry of the previous
century.
